

Be at the hearth of the Storm!

BE AT THE HEART OF THE STORM!!!

Purchasing a spa is a major investment and we are aware of it. Our spas are developed with accessibility, comfort, and relaxation in mind. No more hassles with delivery or site preparation, and no more electrical installation problems. There's no need to keep a list of things to do before receiving your new spa. Our **Storm** spa will bring you peace of mind with how easy it is to purchase, its ease of delivery, installation, and connection.

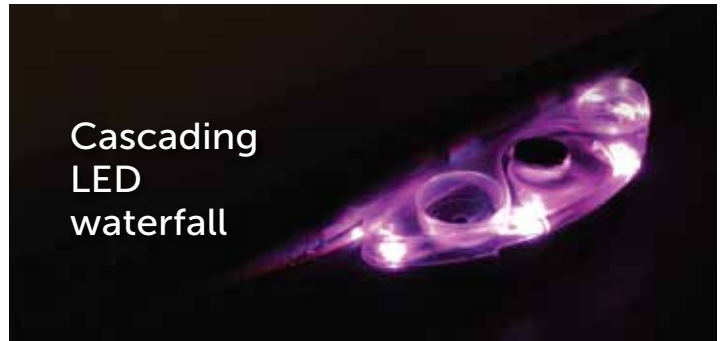

Why the name Storm?

The **Storm** gets its name from nature. The often uncontrollable force of nature that is the storm reminds us of the powerful movement of water and the constant warm currents when we use the **Storm** spa; however, you can be in full control of this one. The **Storm** spa is equipped with 20 resistant stainless steel jets placed in such a way as to provide you with a unique and varied massage depending on your position or where you are sitting in the spa.

Seat variety is important in a spa, so we equipped the Storm with two ergonomic captain's chairs of different depths that can suit different body shapes and a comfortable hybrid triple bench that can be used in sitting or reclining position, a must in our opinion! With its illuminated quadruple LED cascading waterfall, 4 exterior corner lights, as well as a powerful main light, you can be assured that your evenings will be filled with an exclusive ambient light. Finally, this affordable spa has an air control button with a dual-speed pump that allows improved control of the water flow, all at your fingertips. The **Storm** has nothing to envy the much more expensive spas that are more often than not much less comfortable. This 120V quick-connect spa is easily convertible to 240V.

FEATURES

SPECIFICATIONS

Dimension	82" x 72" x 35"
Estimated dry weight (lbs)	345
Water capacity (liters)	1,000
Poids plein (lbs estimées)	2,610
Stations	5 - 6
Stainless steel finish jets	20
Waterfall	Illuminated
Lighting	LED
UV	Ready (not installed)
InnovaFlow	Included
Structure	Polyethylene monocoque
Insulation	Thermofoil™
