

STORM SPA

DRAINING VALVE LOCATION

To help you clean your spa, we've added a **draining valve**.

**Here's where
it's located
on the
Storm spa**

DRAINAGE FREQUENCY

You should drain and refill your spa every **one to three months** depending on usage. You should also replace the filter cartridge and wipe down the spa.

To access it, **remove the panel** under the keypad.

The drain hose, identified by a **green sticker**, is located to the right.

In some cases, it may be hidden behind spa pack or pump.

IMPORTANT

Once you've finished cleaning your spa, make sure you replace the thermofoil completely, to avoid losing energy efficiency, before replacing the panel.
