

IMPORTANT

MODEL BLIZZARD

When using the **blower** by pressing the auxiliary (AUX) button,

it is important not to close the air valves completely.

The **pump (blower)** needs air for propulsion in the jets and without this air supply, the **blower** can heat up and cause long-term breakdown..

Please inform your customers

► The **BLOWER** for spa is a pump that operates in overpressure, a system independent of your spa pump. The device draws in air to give extra power to the spa's jets. jets.
